

**General Notes:**

1. All dimensions are in millimetres unless otherwise noted.
2. The Zero Point is the intersection of the Datum Water Line (dwl) with the stemface.
3. Positions are measured fwd and aft (marked "-") of the Zero Point.
4. Heights are measured above and below (marked "+/-") the dwl.
5. Offsets are measured each side of the fore-&-aft centreline (marked "e" or c/line).
6. Waterlines are designated "wl" followed by their height.
7. Buttocks are designated "b" followed by their offset.
8. Diagonals are designated "d" followed by their start height on the centreline and their angle to it.
9. Offsets on diagonals are measured down the angle of the diagonal.
10. Offsets are to inside of skin unless noted otherwise.

**Specific Notes:**

1. This plan shows the plank top edges.
2. Because of the plank laps, the topstrake will be actually 40mm wider and the garboard apparently 40mm narrower. The other planks will be visually the widths shown but all 40mm displaced because of the plank laps.
3. See Table of Offsets & Girths (on separate sheet) for dimensions to mark out top edges on boat. Also see Instructions.
